

Vivek Kharnotia

(+91) 7780962225 | vivekxharnotia123@gmail.com | <https://www.linkedin.com/in/vivek-kharnotia-ba0171283/>

Summary

Aspiring Machine Learning Engineer with solid Python and deep learning expertise. M.Tech student in Artificial Intelligence and Machine Learning experienced in CNN-based image classification, data preprocessing, and end-to-end ML project development. Proficient in pandas, NumPy, TensorFlow, scikit-learn, and practical ML pipelines.

Education

Lovely Professional University

M.Tech in Artificial Intelligence and Machine Learning - CGPA: 7.3

Phagwara, Punjab

July 2025 -

L.D College of Engineering

CGPA - 7.3%

Ahmedabad

Aug 2020 - June 2024

Internship and Training Experience

Internship - Web Development(6 months)

HYBRID TECH SOLUTION

Jan 2024 – June 2024

Ahmedabad

- Developed and maintained web application modules during a 6-month internship.
- Worked on real-world web development projects during this period.
- Worked on frontend development and bug fixing.
- Assisted in application development, testing, and maintenance.

Summer Intern – Software Engineering

TATVASOFT

Jul 2023 – Aug 2023(2 Months)

Ahmedabad

- Worked on core programming fundamentals and problem-solving techniques.
- Implemented Data Structures such as arrays, linked lists, stacks, and queues.
- Gained hands-on experience in writing efficient and clean code.

Projects

Cloud-Native Snippet Management API with Automated CI/CD on AWS

Jan 2026 – Feb 2026

- Technologies: Python, Flask, Docker, GitHub Actions, AWS EC2*
- Developed a RESTful Snippet Management API using Flask to store and retrieve programming code snippets with efficient search functionality.
- Containerized the application using Docker and implemented persistent JSON-based storage to retain snippets across deployments.
- Built an automated CI/CD pipeline with GitHub Actions to continuously build and deploy the service on AWS EC2 via SSH.

Scalable E-Commerce Web Application | HTML, CSS, JavaScript, Backend, Database Jun. 2024 - Aug. 2024

- Designed and developed a scalable e-commerce web application with modular frontend and backend architecture.
- Implemented user authentication, product catalog, cart management, and order processing features..
- Built backend CRUD services with responsive UI, validation, and error handling for reliable user experience.

Technical Skills

Languages: Python, SQL, C++

Data Analysis and ML Tools: Pandas, NumPy, Matplotlib, TensorFlow, PyTorch

Machine Learning and Data Handling: Image Classification, Dataset Preprocessing, Model Training Evaluation

DSA: Arrays, Linked Lists, Stacks, Queues, Recursion, Sorting, Searching

Version Control: Git, GitHub, Operating Systems, Computer Networking

Certifications

- AWS Certified Cloud Practitioner by Udemy. Feb - 2026
- Data Structures and Algorithms (DSA) By Board Infinity. July - 2023
